

Wine-trip Portugal

SOTTO IL TAPPO

Beautiful Porto

Porto owes its fame mainly to Port (wine) but the city is much more than Port alone, of course we do go on delicious tastings of Port.

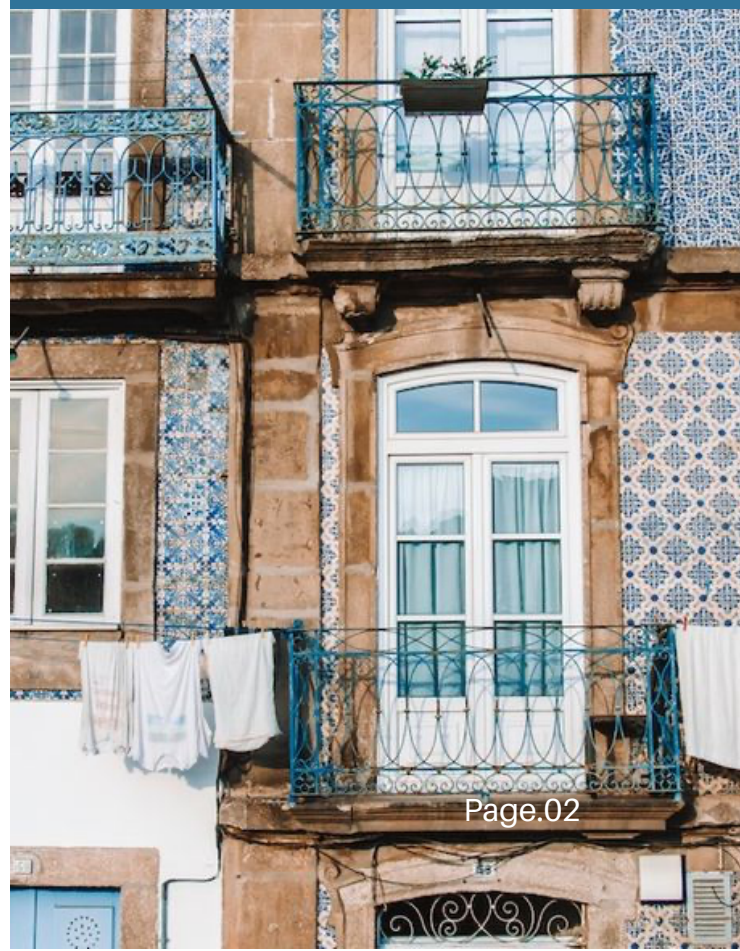

In particular, Porto's historic city center is more than worth a visit. The beautiful narrow streets, azulejo houses and stunning views in this district make Porto a special experience.

→ Porto was founded during the Roman rule of the Iberian Peninsula. Long before this time, the area around the city was inhabited. Porto's real rise occurred during the Middle Ages. The Sé Cathedral and many other historic buildings come from this period.

In the last century, the city was slowly declining, but since the historic downtown was listed as a UNESCO World Heritage Site, the city is beginning to show its former greatness again.

Tips for Porto:

- The tap water in Porto is drinkable but can have a chlorine taste. To avoid this, it is best to drink bottled water.
- Many stores and Banks here take a siesta between 13:00 and 15:00, keep this in mind otherwise you will find yourself in front of a closed door.
- Beware of people who speak to you on the street, they almost always need something from you. In most cases they try to take money from you in an underhanded way.
